SB-4102

Active Shooter/Armed Aggressor

A simple, practical foundation for alerting, responding to,
and recovering from an active threat on site.

SERIES 4000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

An active shooter or armed aggressor event — a firearm, edged weapon, vehicle, or other means used to cause mass harm — is rare, but a facility with no plan turns rare into catastrophic.

Active Shooter/Armed Aggressor is the system that answers three questions before anything happens: how does an alert reach everyone, what are employees trained to do regardless of the weapon involved, and how does the facility coordinate with law enforcement once they arrive.

What This System Covers

Alert &
Notification

Avoid, Deny,
Defend

Law Enforcement
Coordination

Recovery &
Support

What's Inside the Full System

SB-4102 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
