SB-3107

Alarm & Intrusion Systems

Pick the right monitoring provider, specify the equipment your facility actually needs, and keep the codes that protect it confidential.

SERIES 3000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

Most facilities end up with the alarm system a salesperson designed, not the one they actually need — without an independent way to evaluate a provider or specify equipment, the default is to trust whoever showed up with a quote.

Alarm & Intrusion Systems puts the organization back in control: how to evaluate and select a monitoring provider on the terms that matter, how to specify equipment against documented risk instead of a vendor's recommendation, and how alarm codes stay confidential once the system is live.

What This System Covers

Choosing a
Monitoring

Equipment That
Fits the

Code Control &
Confidentiality

Alarm Response &
Verification

What's Inside the Full System

SB-3107 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
