Badge Systems

Design a badge program people actually look at, issue it on purpose,
and know the moment one goes missing.

SERIES 3000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

An ID badge only works as a control if it visually communicates who someone is, and everyone around it has actually been trained to look. Most facilities get the printing right and quietly lose the second part.

Badge Systems keeps a badge doing its job: visually distinct badge types, a controlled issuance and return process, and a workforce that actually challenges someone without one — the physical card and verification culture, not the electronic access levels behind it.

What This System Covers

Badge Design &
Types

Issuance &
Return

Renewal &
Expiration

Visual
Verification

What's Inside the Full System

SB-3105 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
