SB-4106

Business Continuity

A simple, practical foundation for keeping critical operations running through a disruption — and recovering quickly once it passes.

SERIES 4000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

A severe storm, a facility loss, or an extended IT outage can stop operations without warning. Most companies have insurance for the damage, but no plan for the hours and days in between.

Business Continuity is the system that answers three questions before anything happens: which functions absolutely cannot stop, how does the company keep them running, and who decides when to activate the plan.

What This System Covers

Critical
Function

Backup &
Recovery

Alternate
Operations

Communication &
Activation

What's Inside the Full System

SB-4106 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
