

THE SECURITY BLUEPRINT™

SECUREOPS™

SB-3103

Camera Program

Decide camera placement, control access to footage,
and set retention.

SERIES 3000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

A camera system that no one designed on purpose usually has the same three problems: gaps in coverage where incidents actually happen, footage no one can find when it matters, and a viewer list nobody remembers approving.

This system covers the four decisions every facility has to make: where cameras go, who can view or export footage, how long footage is kept, and how you verify the system is still working the way it was designed.

What This System Covers

Placement

Access Control

Retention

Verification

What's Inside the Full System

SB-3103 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
