SB-4103

Evacuation

A simple, practical foundation for getting everyone out safely and knowing, within minutes, that everyone is accounted for.

SERIES 4000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

A fire, a gas leak, or any number of emergencies can require a facility to empty in minutes. Most companies have exits and an alarm, but no defined process for confirming everyone got out.

Evacuation is the system that answers three questions before anything happens: how does everyone know it's time to leave, how do they get out safely, and how does the facility confirm everyone is accounted for once they're outside.

What This System Covers

Routes & Exits

Alarm &
Notification

Assembly &
Accountability

Those Who Need

What's Inside the Full System

SB-4103 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
