SB-6101

Executive Leadership

A simple, practical foundation for reporting security program performance and making the case for the resources it needs.

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

Security programs are often judged by whether anything went wrong, not by what was prevented — which makes it hard to justify a budget request or hold leadership's attention.

Executive Leadership is the system that answers three questions before anything happens: how does the program report performance, how does it ask for what it needs, and how does it keep leadership's confidence between the requests.

What's Inside the Full System

SB-6101 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
