SB-6105

Executive Protection

Threat-assess, monitor, and protect the small group of leaders whose visibility makes them a distinct target.

SERIES 6000 • FOUNDATION • V1.0 • FREE PREVIEW

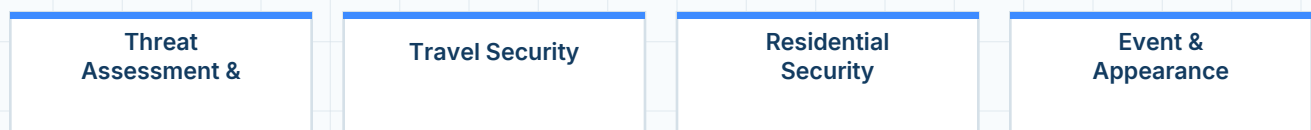

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

A workplace violence program is built for the whole workforce, and it's reactive by design — it waits for a report, then responds. A small number of senior leaders carry a different, often higher, baseline risk that a report-driven process isn't built to catch.

Executive Protection is the proactive system built specifically for that small group: baseline and ongoing threat assessment, secured travel, residential security coordination, and protected public appearances — for the named individuals whose visibility, wealth, or authority makes them a distinct target, not the general workforce.

What This System Covers

What's Inside the Full System

SB-6105 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
