

THE SECURITY BLUEPRINT™

SECUREOPS™

SB-2101

Facility Risk Assessment

A structured way to see your facility's security program clearly —
score its maturity, prioritize the gaps, and build the roadmap to close them.

SERIES 2000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

Most facilities don't have a security budget problem — they have a prioritization problem. Without a structured way to see the whole program at once, effort goes wherever the last incident happened, not wherever the risk actually is.

Facility Risk Assessment is the diagnostic that starts every SecureOps™ implementation. It surveys every operational domain and scores its maturity, producing a prioritized roadmap — not a binder that sits on a shelf.

What This System Covers

Site & Program
Inventory

Threat &
Vulnerability ID

Domain Maturity
Scoring

Risk
Prioritization

Reassessment

What's Inside the Full System

SB-2101 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
