SB-4104

Fire

A simple, practical foundation for preventing fires, maintaining life-safety equipment, and responding the moment one starts.

SERIES 4000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

Most facility fires are preventable, and most fire deaths happen not from the fire itself but from confusion in the first few minutes about where equipment is or what to do.

Fire is the system that answers three questions before anything happens: what keeps a fire from starting, what equipment is in place if one does, and what employees are trained to do the moment they discover one.

What This System Covers

Prevention &
Housekeeping

Detection &
Suppression

Response

Inspection &
Maintenance

What's Inside the Full System

SB-4104 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
