SB-3106

Guard Force Management

Turn post orders, patrols, and shift handoffs into a system you can verify — not just a binder no one has opened since onboarding.

SERIES 3000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

Most guard forces run on three assumptions: post orders are being followed, patrols are actually happening, and shift handoffs don't lose information. None of that gets tested until something goes wrong.

Guard Force Management is the verification layer around your guard force, proprietary or contracted — post orders, patrol logs, shift pass-down, and performance oversight, so you can prove what happened on a given post, on a given night, instead of assuming it.

What This System Covers

Post Orders

Patrol & Rounds

Shift
Accountability

Performance
Oversight

What's Inside the Full System

SB-3106 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
