

THE SECURITY BLUEPRINT™

SECUREOPS™

SB-5101

Incident Response

A simple, practical foundation for reporting, escalating, and learning from every security incident — not just the big ones.

SERIES 5000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

Most facilities deal with security incidents constantly — a theft, a damaged door, a trespasser. Without a consistent way to report and track them, the pattern behind them stays invisible.

Incident Response is the system that answers three questions every time something happens: how does it get reported, who decides how serious it is, and what does the organization do with what it learns.

What This System Covers

Reporting &
Intake

Classification &
Escalation

Investigation &
Documentation

Corrective
Action & Trends

What's Inside the Full System

SB-5101 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
