SECUREOPS™

SB-3102

Key Control

Track every key, who holds it, and what to do
the moment one goes missing.

SERIES 3000 • FOUNDATION • V1.0 • FREE PREVIEW

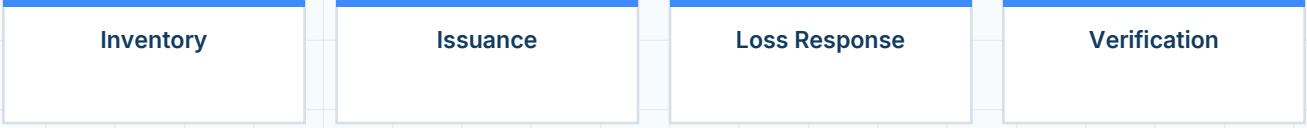

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

A key is access, full stop. A facility can have cameras, alarms, and a badge system, and still be wide open if no one knows how many keys exist, who has them, or what a master key actually opens.

Key Control is the system that answers three questions for every key in the building: what does it open, who holds it right now, and what happens the moment it goes missing.

What This System Covers

Inventory

Issuance

Loss Response

Verification

What's Inside the Full System

SB-3102 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
