SECUREOPS™

SB-4107

Lone & Field Worker Safety

A simple, practical foundation for keeping lone and field workers safe —
in transit, on-site, and everywhere in between.

SERIES 4000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

Plumbers, home healthcare workers, and similar field roles spend their entire workday outside the protections of a fixed facility — no coworkers nearby, no security desk to call, entering homes and job sites they don't control, alone or in a small crew.

Lone & Field Worker Safety builds a documented check-in and location-awareness routine, transit safety expectations for the drive between assignments, hazard recognition for what's waiting at the door, and a clear escalation path when something goes wrong — covering both fully solo workers and small crews.

What This System Covers

Check-In &
Location

Transit &
Driving Safety

On-Site & In-
Home Hazard

Duress Response
& Escalation

What's Inside the Full System

SB-4107 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
