SECUREOPS™

SB-2103

Site Audits

Formally verify every security system already in place
is actually being followed, not just documented.

SERIES 2000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

Why This Matters

A company can have every security system well-designed on paper and still fail in practice if no one ever formally checks whether it's actually being followed day to day — the badge log, the camera retention policy, the visitor escort rule.

Site Audits is the formal, scheduled compliance review that spans every operational domain already in place — not a diagnostic that finds new gaps, and not an informal walkthrough. It is the periodic grade card for how well the facility executes the security systems it already has.

What This System Covers

Audit Scope &
Scheduling

Compliance
Scoring

Findings &
Corrective

Reporting &
Trend Tracking

What's Inside the Full System

SB-2103 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
