# Visitor Management

Build a complete visitor, contractor, badge, escort,  
and delivery process.

SERIES 3000 • FOUNDATION • V1.0 • FREE PREVIEW

SIMPLE. PRACTICAL. TRANSFERABLE.

## Why This Matters

Every facility that allows outside visitors, contractors, or delivery drivers onsite is exposed the moment that person walks through the door without a defined process. Most incidents involving unauthorized access do not begin with a break-in — they begin with someone being let in.

Visitor Management is the system that answers three questions every time someone arrives who does not work at your facility: who are they, why are they here, and who is responsible for them while they are onsite.

## What This System Covers

Entry Control

Identification &  
Sign-In

Escort & Access

Verification

## What's Inside the Full System

SB-3101 is a complete 10-section operating system — Policy, Standard Operating Procedure, Roles & Responsibilities, Forms, Checklists, an Audit Tool, a KPI Dashboard, an Executive Summary, and an AI Prompt Pack — built to be implemented, not just read.
